JOHN HARRY S

SENIOR MANAGER – IT | IT INFRASTRUCTURE | ENTERPRISE ARCHITECTURE | CYBERSECURITY

Hosur / Bengaluru (Electronic City) | 8892593190 | johnharrys0007@gmail.com | Portfolio: johnharrys.github.io

PROFESSIONAL SUMMARY

IT infrastructure and enterprise technology professional with 18+ years of experience across IT infrastructure, enterprise architecture, cybersecurity, server and network operations, backup and disaster recovery. Currently working as Senior Manager – IT with responsibility for IT infrastructure operations, infrastructure modernization, security controls, backup and recovery, service continuity, audit readiness and implementation of new IT infrastructure.

Strong hands-on experience across Windows and Linux environments, networking, virtualization, firewall, backup, disaster recovery and open-source enterprise platforms. In addition to core IT responsibilities, have independently contributed to in-house ERP and business application development by understanding departmental workflows, converting business requirements into software solutions and reducing dependency on external software licensing and AMC costs, contributing to ₹20+ lakh annual technology cost savings.

CORE COMPETENCIES

IT Strategy & Infrastructure Roadmap | Enterprise Architecture | IT Operations & Service Management | Infrastructure Implementation | Infrastructure Cost Optimization | Vendor & License Management | Cybersecurity & Network Security | Backup & Disaster Recovery | Business Continuity Planning | Virtualization & Server Infrastructure | Network Architecture, Routing & Switching | Linux & Windows Server | Open-Source Enterprise Platforms | Ransomware Protection Strategy | Data Protection & Recovery | Technology Standardization | IT Infrastructure Design

CAREER HIGHLIGHTS

- Delivered ₹20+ lakh in cumulative annual cost savings for the organization through technology cost optimization, open-source adoption, in-house software development and reduction of recurring software licensing and AMC expenses.
- Designed and implemented a vendor-independent IT environment covering infrastructure, security, backup, disaster recovery and enterprise applications.
- Designed VM-based, hardware-independent infrastructure using Proxmox virtualization.
- Implemented network segmentation/isolation and ransomware-resilience controls as part of the organization's cybersecurity strategy.
- Designed multi-location backup and disaster-recovery architecture with focus on recoverability, business continuity and reduced downtime.
- Led end-to-end IT infrastructure activities covering architecture, implementation, operations, security, backup, recovery and user support.

ADDITIONAL BUSINESS CONTRIBUTION – IN-HOUSE ERP & SOFTWARE DEVELOPMENT

In addition to core IT infrastructure responsibilities, independently contributed to the organization's digital transformation by designing and developing in-house ERP and business software solutions based on actual departmental workflows and operational requirements.

- Designed and developed company-owned ERP applications to digitize and streamline business processes across Purchase, Inventory, HR and other departmental workflows.
- Worked directly with user departments to understand existing manual processes, identify process gaps and translate operational requirements into software workflows.
- Developed workflow-based applications covering data entry, approvals, status tracking, process control and reporting.
- Reduced dependency on externally licensed ERP/software platforms and recurring AMC/support costs through in-house software development.

• Built software solutions with a focus on unlimited-user capability, internal ownership, customization and reduced long-term vendor dependency.

• Contributed to an overall technology cost reduction of ₹20+ lakh annually through a combination of in-house software development, open-source adoption, license optimization and reduction of recurring AMC expenditure.

• Continued to support and enhance internally developed applications based on changing business requirements and user feedback.

Note: ERP/software development was an additional responsibility/contribution beyond the primary IT infrastructure role and was undertaken to deliver business process improvements and measurable cost savings for the organization.

PROFESSIONAL EXPERIENCE

Senior Manager – IT | AvioHelitronics Infosystems Pvt. Ltd. | 2026 – Present

- Own day-to-day IT infrastructure operations covering servers, network services, firewall, backup, data protection and critical IT services.
- Monitor the health, availability and operational status of IT infrastructure, backup jobs, servers and essential services to maintain business continuity.
- Plan and implement new IT infrastructure, including server, network, security, backup and service architecture improvements based on business and operational requirements.
- Strengthen backup and disaster-recovery practices through scheduled backup monitoring, backup verification, recovery planning and restoration readiness.
- Develop and implement network segmentation and isolation controls to reduce exposure to malware, ransomware and unauthorized access between business and manufacturing environments.
- Support cybersecurity controls including firewall administration, endpoint/system protection, access control, patching and reduction of unnecessary internet or external-access exposure.
- Maintain IT infrastructure documentation, asset records, backup records and operational evidence required for internal controls and audit readiness.
- Support ISMS and information-security audit readiness, including preparation of IT policies, records, backup evidence, asset information, access controls and recovery documentation.
- Manage Windows and Linux servers, network infrastructure, virtualization platforms and enterprise IT services, with focus on reliability and controlled change.
- Evaluate and implement practical, cost-effective and vendor-independent technologies, including suitable open-source platforms where operationally appropriate.
- Work with management and departmental users to identify IT requirements, prioritize infrastructure improvements and minimize operational disruption during implementation.
- Drive standardization of IT infrastructure, backup, security and service-management practices to improve maintainability, resilience and operational control.

IT Infrastructure Lead | Lake Chemicals Pvt. Ltd. | Sr. Executive | 2016 – 2026

- Led enterprise IT infrastructure architecture covering servers, networking, firewall, virtualization, security and data protection.
- Defined and executed long-term IT architecture and infrastructure direction aligned with business requirements.
- Designed and implemented Proxmox-based virtualized infrastructure to support a scalable, hardware-independent environment.
- Developed and managed a company-owned ERP platform spanning Purchase, Inventory, HR, Finance and workflow automation.
- Reduced technology operating costs by eliminating or minimizing recurring software licensing, ERP AMC and infrastructure AMC expenditure.
- Drove vendor-independent technology adoption and evaluated open-source alternatives where suitable.
- Designed secure backup and disaster-recovery architecture, including multi-location backup and recovery planning.
- Implemented network segmentation and isolation controls as part of cybersecurity and ransomware-resilience strategy.

- Managed enterprise IT operations across infrastructure, platforms, security, backup and recovery environments.

Senior System Engineer | Sri Tech | 2015 – 2016

- Supported enterprise systems and IT infrastructure operations.
- Handled system administration, troubleshooting, maintenance and technical support activities.

Senior Systems Engineer | Hi Tech Computers | 2014 – 2015

- Supported systems, infrastructure and end-user technology environments.
- Performed technical troubleshooting, maintenance and system support activities.

Senior Service Engineer | Hosur IT Support | 2011 – 2014

- Provided IT service and technical support for computing environments.
- Handled system troubleshooting, maintenance and user support activities.

System Engineer | GKV Computers | 2009 – 2011

- Performed system engineering, technical support and infrastructure maintenance activities.

Junior Engineer | Acer Service | 2008 – 2009

- Provided computer hardware, service and technical support.

Junior Engineer | Tech Service | 2007

- Provided technical service and support activities.

TECHNOLOGY & TOOLS

Infrastructure & OS: Windows Server, Linux, Server Infrastructure | Virtualization: Proxmox | Collaboration/Productivity: Nextcloud, OnlyOffice | Networking & Security: Firewall, Routing, Switching, VLAN, Network Segmentation, Network Isolation, Ransomware Protection | Backup & DR: Duplicati, Multi-location Backup, Disaster Recovery Planning, Data Protection & Recovery | Enterprise Applications: In-house ERP, Purchase, Inventory, HR, Finance, Workflow Automation | Database & Analytics: MySQL, Apache Superset | Messaging: Postfix, Dovecot | Development: Angular, Node.js, MySQL

SELECTED IT TRANSFORMATION INITIATIVES

- IT Infrastructure Modernization – Planned and implemented infrastructure improvements covering servers, networking, security, backup and critical services.
- Backup & Disaster Recovery – Established structured backup monitoring, recovery planning and multi-location protection to improve resilience.
- Cybersecurity Architecture – Implemented network segmentation/isolation and ransomware-resilience controls to reduce lateral movement and unauthorized exposure.
- In-House ERP Transformation – Built a company-owned ERP platform covering core business workflows and enterprise functions.
- Open-Source Enterprise Migration – Replaced or reduced recurring-cost software components with suitable open-source platforms.
- Virtualized Infrastructure – Established Proxmox-based VM infrastructure designed for hardware independence and scalability.

EDUCATION

Secondary School Education | St. Joseph Higher Secondary School, Hosur
Pursuing Degree – BCA (UG) Bharathidasan University, Tiruchirappalli

ADDITIONAL INFORMATION

- Total Experience: 18+ years
- Location: Hosur / Bengaluru (Attibelle, Chandapura and Electronic city)
- Target Roles: Senior Manager – IT
